

Paragon Cone-Fire Firing Record

This record sheet will help you learn from each firing.

Kiln: If you have more than one kiln, write in the model number.

Total Firing Time: This will help you determine when to monitor the kiln during the next firing.

Vented Lid: In ceramics, the lid is opened part way to release moisture. Write in total hours the lid was vented. (Not applicable if you are using the Orton vent.)

Shelf Cones: Though your kiln is automatic, we recommend using witness cones on the shelf. Record the bending as a clock number (from one to six o'clock), or sketch the cones.

Sketch of Firing Chamber: Include any information that will help with future firings: shelf spacing, the height of posts, the type of ware on each shelf, etc.

Firing Number: Helps you keep track of how many times you have fired your kiln.

Kilns and furnaces you can depend on.
